Kelveen

Oligo

The unobtrusively pleasing shape allows Kelveen to discreetly adjust to every style, and fully persuade via its stunning lighting effect. The distinctive feature of the luminaire is the high quality lens with emission angles of 40 and 90°, providing a technically impressive lighting solution for the home environment as well as the commercial sector. No tools are needed to replace the lens, so that the correct beam angle can be easily determined and adjusted. Available as a ceiling luminaire in three variants (recessed, partly recessed and top-mount), and as a spotlight.

Cielo

Ocari

With its lightness, Cielo sublimely floats in the air. The reserved and random texture in convex acryl glass shows its surprisingly strong lightning effects only in its near spatial environment. The luminous threads create a soft and homogeneously glare-free lighting atmosphere. Cielo is lit by wioFLEX SLIM. Designed, manufactured in Germany and featuring an LED-technique created in Germany.

Nano Line

Luci

Due to be released in the summer of 2014, this ultra slim line light can accentuate the surrounding space and at 6mm, is Luci's slimmest fixed light. Suitable for stair lighting, pendant display lighting and building and store façade design line lighting, this direct lighting fixture is recommended for indoor use only. The product can also act as a guidance booster and be installed in handrails, helping the visually impaired.

ringO series

ONOK

This family of recessed downlights with an attractive and innovative soft design, provides great visual comfort. Equipped with the latest LED technology, this product is the ideal high quality LED solution for shops, museums, hotels, restaurants and offices. This range offers many options, giving clients the possibility to adapt the product to the real needs of their project.

3 different beam reflectors, 25° / 36° / 60°, can be combined with different regulation systems, 1-10V/PUSH or DALI. A changeable diffusor with three options is available: prismatic, ice or clear. The colour temperature also varies.

SL740XL LED

Spittler

This floor lamp is suitable for modern working environments. Its light flux of 15600 lm gives the SL740XL LED one of the highest light levels available. High value optics in connection with very effective LEDs provide high efficiency while a strong indirect share of light is provided for a comfortable brightening of the ceiling and the general illumination of the office. The lamp is part of a wide-ranging family of pendant, surface mounted, wall and floor lamps.

CoeLux 35 / 40 / 60

CoeLux

CoeLux is an optical device that reproduces the experience of the sun and sky. Through an artificial skylight, "sun rays" enter a room casting blue-tinged shadows, which are coloured by the diffused light from the "sky". Nano-particles reproduce the phenomenon of atmospheric Rayleigh scattering, while LED illuminators with complex optics mimic the sun and create the sensation of infinite space. www.coelux.com
