# LAVISH LUMINAIRES

Innovation knows no boundaries and neither does OLIGO with their latest collection of award-winning light fixtures that operate with innovative dimming features.

**D**im the dull and illuminate your interior with OLIGO's collection of cutting edge table and floor luminaires. Introducing the Kelveen series, a German-designed, developed and manufactured, sleek lighting fixture from OLIGO. Equipped with cutting edge optical components, Kelveen creates a perfectly adjustable working and reading light for homes and offices. Embodying a sleek, compelling design and innovative luminaire technologies, Kelveen was recently awarded the German Design Award 2018.

Catered for perfectionists and stilists alike, Kelveen is engineered with a slim silhouette and filigree details, which emphasises on the elegance of its design. Ball joints located at the base and shade of the luminaire ensure easy adjustment, while there are no visible cables to detract from the overall visual appearance as these have been incorporated into the body. The high quality lamp head is made entirely out of aluminium, enabling balanced thermal management and longevity of the integrated LED. What's more exciting is that the table luminaire can be controlled conveniently and intuitively via a dimmer switch as the floor luminaire is equipped with a touch dimmer.
